## AFGLC Mission Statement

The fundamental mission of the AFGLC (*American Foundation for Greek Language and Culture*) is to assist in the preservation and enhancement of Greek Culture and Language in the United States through our institutions of higher learning. The Foundation was established by a group of concerned Greeks and Philhellenes across America, whose role is to make available to the present as well as secure for the future the historic and cultural role of the Hellenic tradition and language. We strongly believe that we can most effectively accomplish this by the establishment of “*INTERDISCIPLINARY CENTERS OF HELLENIC STUDIES*” (ICHS) at various academic institutions on a regular basis across the United States. Each of the ICHS will typically consist of five endowed professors in the following areas:

The foundation is situated as a nonprofit organization with its headquarters in the State of Florida. Its scope and patronage are envisioned as national and international with particular emphasis on the bonds that exist between Greece and the United States.

AFGLC welcomes people who share with us the conviction that the revival of interest in the Greek Language and the preservation of the Hellenic heritage are of great importance, given the role that both played in the formation of the values and ideas of our beautiful country. It will be a time to rejoice and celebrate when the students in our colleges and universities have once again the opportunity to study the wealth of meanings that have given our western civilization its solid conceptual foundations in philosophy, in language, the arts and the sciences.

We must not forget what the famous philosopher Alfred North Whitehead said: “That all philosophy is but a series of footnotes of Plato” or Sir Henry Summer Maine’s significant remark “except for the blind forces of nature nothing moves on this earth that is not Greek in its origin.”

---

***“If we do not succeed in the rejuvenation and enhancement of  
Hellenism in the Americas, History will not forgive us.”***

“AFGLC-ICHS FORUM/CONFERENCE 2012”

# Ancient Greek Theater

Ancient Greek theater originated about 600 BC in the city-state of Athens. In the ensuing 400 years (600-200 BC), tragedians such as Aeschylus (525-456 BC), Sophocles (496-406 BC), and Euripides (480-407), and comedy playwrights such as Aristophanes (456-386 BC) and Menander (342-291) produced plays that are still considered to be among the best of their kind. The theaters were built on the side of a hill and were quite large. Thus the ancient theater of Delphi could accommodate 5,000 spectators. Performances were held in a semi-circular space at the bottom of the hill. Typically, the plays included the actors and a chorus of about 50 people. The function of the chorus was to comment on the action of the actors. Two of the most well-known ancient Greek theaters are the Theater of Delphi and the Epidaurus Theater. The image on the front cover is an abstract depiction of an Ancient Greek Theater. What the ghost-like figures represent is left to the imagination of the viewer.

The logo of the AMERICAN FOUNDATION FOR GREEK LANGUAGE AND CULTURE, AFGLC, is taken from a scene on a cup (found at Vulci in Etruria and currently in the British Museum) painted by the Athenian painter Douris around 480 BC. It shows a school scene where a master unrolls a scroll with an epic verse on it. The verse is in the style of Homer, but does not come from either the *Iliad* or *Odyssey*.

Μοῖσα μοι  
ἀ<μ>φι Σκάμανδρον  
ἔϋρων ἄρχομαι  
ἀείψιδεν

Muse,  
I begin to sing for myself  
of fair-flowing Scamander

The design that partially borders the front and back pages of the program was taken from the Elgin Marbles Wing of the British Museum, and illustrates the majestic Meander of the Parthenon frieze. This Hellenic design with its characteristic blue and gold compound undulations was reserved for the most august Athenian state structures. As a variant of the classical Greek key, the meander reflects the continuity of the Hellenic Universe, through the undulating representation of waves and their interplay into the atmosphere.
